Lab-on-a-chip (LOC) devices are broadly used for research in the life sciences and diagnostics and represent a very fast moving field. LOC devices are designed, prototyped and assembled using numerous strategies and materials but some fundamental trends are that these devices typically need to be (1) sealed, (2) supplied with liquids, reagents and samples, and (3) often interconnected with ... Polymer engineering based on reversible covalent chemistry ... Although the polymer engineering enabled by reversible reaction is taking shape, showing great potential of development and benefits for next-generation industry, to the best of our knowledge, there has not yet been a review article combining the related topics together from an application perspective, except for quite a few high-level recent reviews on a number of subtopics [, , , ,].
