# Com Component Object Model

**Com Component Object Model** - The Component Object Model - COM The Component Object Model - COM Program examples compiled using Visual C++ 6.0 compiler on Windows XP Pro machine with Service Pack 2. Topics and sub topics for this tutorial are listed below. Don't forget to read Tenouk's small disclaimer. The supplementary notes for this tutorial are mfc, COleObjectFactory class and .Net. Index: Sat, 13 Apr 2019 23:59:00 GMT Download Com Component Object Model PDF COM in a Nutshell What is Component Object Model (COM)? - Definition from ... Component Object Model (COM) is Microsoft's framework for developing and supporting program component objects. It is aimed at providing similar capabilities to those defined in the Common Object Request Broker Architecture (), a framework for the interoperation of distributed objects in a network that is supported by other major companies in the computer industry. Component Object Model (COM) - Windows applications ... The Component Object Model is a platform-independent, distributed, object-oriented system for creating binary software components that can interact. COM is the foundation technology for Microsoft's OLE (compound documents) and ActiveX technologies. (???) Component Object Model Communication Fundamentals ... PDF | COM (Component Object Model) is the fastest growing model. Microsoft exposes any new technology by implementing each new subsystem as a COM object. COM is the way to interact with subsystems ... Component Object Model (COM) | Microsoft Docs Sets and queries global properties of the Component Object Model (COM) runtime. IGlobalOptions: Sets and queries global properties of the Component Object Model (COM) runtime. IInitializeSpy: Performs initialization or cleanup when entering or exiting a COM apartment. IInternalUnknown DCOM Architecture Page Options - Hadassah Object RPC (ORPC) References Introduction The Microsoft® Distributed Component Object Model (DCOM) extends the Component Object Model (COM) to support communication among objects on different computers—on a local area network (LAN), a wide area network (WAN), or even the Internet.
